Up to 75% of Africa’s population uses groundwater as the main drinking water source, and groundwater is blue symbolising groundwater basins receiving very little recharge (generally less than 15 mm per year). This (IHME1500), the only harmonised, pan-European dataset at a scale of 1 : 1 500 000. For the IHME1500, a and regional transboundary hydrogeological maps, bringing together generalised overview maps and regional

The present map depicts the current status of WHYMAP’s groundwater resources mapping in Africa, prepa -
